Bengaluru, Karnataka, India | +91 9606173729 | ecavishu@gmail.com | linkedin.com/in/vishurao06

Professional Summary

Cloud solutions consultant with experience across cloud computing, software engineering, networking, Windows and Linux systems, virtualization, and infrastructure hardware. Strong background in cloud operations, hybrid connectivity, security, monitoring, troubleshooting, disaster recovery, and enterprise infrastructure optimization. Experienced with Azure compute and networking services, Linux administration, automation, and cloud-native technologies including Terraform, Azure DevOps, Docker, Kubernetes, SSH, Git, and Python scripting. Additional experience in server hardware, workstation engineering, and embedded systems.

Core Skills

Cloud Platforms: Microsoft Azure, Azure Networking, Azure Compute, VM Scale Sets, AKS, Container Instances, App Service, Azure Site Recovery, Recovery Services Vault, Azure Monitor, Management Groups

DevOps / Platform: Linux, SSH, Git, Python, Docker, Kubernetes, Terraform, Azure CLI, YAML, Infrastructure as Code, Remote SSH workflows

Networking / Security: VNets, Subnets, VNet Peering, ExpressRoute, VPN Gateway, Load Balancers, DNS, Traffic Manager, CDN, Front Door, Private Link, Network Security, Firewalls, Route Tables

Systems / Operations: Windows Server, Linux Administration, Active Directory, Azure AD, Patch Management, Backup and Recovery, Incident Management, Troubleshooting, Documentation

Professional Experience

Cloud Consultant | Hewlett Packard Enterprise | Mar 2022 - Aug 2023

- Deployed and managed Azure compute services including VMs, VM Scale Sets, AKS, Container Instances, App Service, autoscaling, Load Balancers, and Spot Instances.
- Configured and supported Azure networking services including VNets, subnets, ExpressRoute, VPN Gateway, DNS, Traffic Manager, CDN, Front Door, Private Link, Network Watcher, UDRs, and route tables.
- Designed secure connectivity between Azure and on-premises, AWS, and Oracle Cloud environments using Virtual Network Gateway, ExpressRoute, and segmented routing controls.
- Performed Linux administration, remote troubleshooting, and cloud operations using SSH, Git, Python, and command-line tooling across Azure VM infrastructure
- Implemented backup, restore, and disaster recovery processes using Azure Site Recovery and Recovery Services Vault, supporting resilient cloud operations.
- Supported storage and security services including Azure Disks, File, Blob, IAM roles, Key Vault, Azure Monitor, and Management Groups.
- Worked with Terraform and Azure DevOps pipelines for infrastructure provisioning and deployment automation in Azure environments.
- Supported containerized deployments using Docker, Azure Container Instances, and AKS for cloud-based workloads.
- Utilized Dynatrace, Azure Monitor, and Microsoft Defender for Cloud for monitoring, security posture management, troubleshooting, and operational visibility.
- Assisted with cloud automation and infrastructure operations using SSH, Git, Python, and Linux command-line tooling.
- Performed Windows and Linux patching and created SOPs and training documentation for cloud engineers.

Technical Consultant | Self-Employed | Apr 2017 - Mar 2022

- Deployed and configured high availability sets, VM Scale Sets, load balancers, VNets, NSGs, and Kubernetes workloads in Azure cloud environments.
- Configured VNet peering, firewalls, and load balancers to support secure cloud connectivity and access control.

- Administered Azure AD users, groups, and devices and supported hybrid identity migration using AD Connect.
- Supported automation and scripting tasks with Python and Unix shell scripting for infrastructure and system administration workflows.
- Installed and configured server hardware, networking equipment, and workstations; supported virtualization and Linux-based lab environments.

Software Engineer | HCLTech | May 2016 - Apr 2017

- Resolved software, script, hardware, and connectivity issues across Unix VCT servers and ClearQuest servers.
- Performed backup, restore, creation, and repair of VOBs, vaults, and caches.
- Led repository migrations and supported patching and upgrades.
- Developed Python and Unix shell scripts to automate system administration tasks and improve operational efficiency.

Technical Solutions Specialist | Hewlett Packard Enterprise | Jun 2015 - Apr 2016

- Resolved system crashes, network issues, security risks, SharePoint issues, Windows configuration issues, Linux server issues, and enterprise application incidents.
- Supported Windows and Linux administration tasks including user access management, permissions, patching, system troubleshooting, service monitoring, and server maintenance.
- Managed Active Directory permissions for users and groups in Windows environments and assisted with identity and access administration.
- Performed incident management, root cause analysis, log review, and troubleshooting across enterprise infrastructure environments.
- Improved SOPs and delivered knowledge transfer sessions for troubleshooting, operational procedures, and workaround documentation.
- Owned incidents and service requests end-to-end through resolution while meeting operational support and service delivery requirements.

Education

- East Point College of Engineering and Technology - Bachelor's Degree, Computer Programming and Specific Applications | 2012 - 2015
- University of Mysore - Master of Computer Applications (MCA) - Incomplete

Certifications

- Microsoft Certified: Azure Fundamentals
- Configure secure access to your workloads using Azure networking - Microsoft
- Google IT Support Specialization - Grow with Google on Coursera
- Security in Google Cloud Platform Specialization - Grow with Google on Coursera
- Networks and Communications Security - ISC2
- Career Essentials in System Administration by Microsoft and LinkedIn
